1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on October 15, 2004 has been entered.
2. Restriction is required under 35 U.S.C. 121 and 372.
3. This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.
4. In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.
5. Group I, claim(s) 1, 3-6, 10-16, drawn to a two dimensional electroseparation system and method of use.
6. Group II, claim(s) 7-9, 22, drawn to a multiplexed separation system with manifold of specific structure.
7. Group III, claim(s) 17-20, 23, drawn to a method of multiplexed separation.
8. The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The "special technical feature" shared by the three groups is two separation means connected by an interface in which each fraction from the first separation means is passed separately to the second means, and at least one fraction has two or more components. This does

not constitute a "special technical feature" because it is not inventive. See, e.g., columns 8-9 and Figure 5B of Jorgenson et al (5240577).

9. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
